PROFILE

Motivated Information Science & Engineering undergraduate with strong foundations in programming, databases, and web development. Interested in software engineering, ethical hacking, and solving real-world problems through efficient system design. Actively seeking internship opportunities.

EDUCATION

Bachelor of Engineering (B.E.) – Information Science & Engineering Expected 2027
The National Institute of Engineering, Mysuru
Current CGPA: 7.80

Pre-University (PCMC) – Creative PU College, Karkala 2023
Percentage: 96.33%

TECHNICAL SKILLS

- **Programming:** Java, Python, C++, C
- **Web Development:** HTML, CSS, JavaScript
- **Databases:** MySQL, DBMS
- **Tools & Platforms:** Kali Linux, VS Code, IntelliJ IDEA, PyCharm
- **Domains:** Ethical Hacking, Web Development, Software Engineering

PROJECTS

Ecoride – Car Pooling Web Application 

- Developed a full-stack car-pooling platform enabling users to create, search, and join rides.
- Built secure authentication and REST APIs using Node.js, Express, React, and TypeScript.
- Designed responsive UI and backend flows for rides, bookings, and user management.

Timetable Scheduler using Genetic Algorithm 

- Built a GA-based timetable generator in Python to minimize scheduling conflicts.
- Implemented fitness, selection, crossover, and mutation logic.
- Automated scheduling for classrooms, instructors, and time slots.

DBMS Mini Project – Bus Ticket Reservation System

- Designed a database-driven bus ticket reservation system with seat allocation and cancellations.
- Implemented backend logic using MySQL and Java.
